

Accounting for non accountants

Basic principles

Overview

Increasingly, lawyers are learning how helpful it is to have a basic knowledge of accounting. Having a baseline understanding of basic accounting principles and terms can only help lawyers to better understand the full picture of legal matters they work on that may involve elements of accounting.

Designed for lawyers of all experience levels, Basics of Accounting for Lawyers reviews how some common accounting concepts may emerge in legal work, and what lawyers should consider when encountering them. The goal of this program is to help lawyers familiarize themselves with the language of accounting to become better at their practice.
